Risks of Security Futures Transactions

CFTC RULE 4.41 HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

DISCLAIMER: Futures and options trading involves substantial risk of loss and is not suitable for every investor. The valuation of futures and options may fluctuate, and, as a result, clients may lose more than their original investment. The impact of seasonal and geopolitical events is already factored into market prices. The highly leveraged nature of futures trading means that small market movements will have a great impact on your trading account and this can work against you, leading to large losses or can work for you, leading to large gains. If the market moves against you, you may sustain a total loss greater than the amount you deposited into your account.

You are responsible for all the risks and financial resources you use and for the chosen trading system. You should not engage in trading unless you fully understand the nature of the transactions you are entering into and the extent of your exposure to loss. If you do not fully understand these risks you must seek independent advice from your financial adviser. All trading strategies are used at your own risk. This software should not be relied upon as advice or construed as providing recommendations of any kind. It is your responsibility to confirm and decide which trades to make. Trade only with risk capital; that is, trade with money that, if lost, will not adversely impact your lifestyle and your ability to meet your financial obligations.

5 Step Trading Plan

- Step 1 - Background Color
 - Measurement of Overall Market Internals and Trend
 - Red Both are Bearish
 - Black 1 Bullish and 1 Bearish
 - Green Both are Bullish

5 Step Trading Plan

Ninja Alternative DOM Properties

The screenshot displays the NinjaTrader interface with three main components:

- Sim101 DOM Window:** Shows a list of prices from 1206.8 down to 1204.7. The price 1205.7 is highlighted in yellow with a quantity of 1. Below the list are fields for ASK (+ TARGET), BID (- TARGET), and MARKET (0.00).
- Control Center - Newbie-Trader NT3 Power Tool:** A window with tabs for Orders, Strategies, Executions, Positions, Accounts, and Account Performance. It shows a table with columns Bid, Ask, Last, Open, High, and Low, all containing 'n/a'. It also has input fields for Type (<Default>) and Name (^ADD).
- Stop Strategy Dialog Box:** A configuration window for a stop strategy. It includes:
 - Auto breakeven (ticks): 4
 - Profit trigger: 4, Plus: -5
 - Auto trail (ticks): 1 step selected, with Stop loss: 8, Frequency: 1, Profit trigger: 4.
 - Simulated Stop: Vol Trigger: 0 (Value of zero is disabled).

At the bottom of the Sim101 window, there are buttons for REV, FLAT, CLOSE, and C. Below these are fields for Instrument (TF 03-15), Order qty (2), Account (Sim101), TIF (Day), ATM Strategy (Scalp3), and ATM Strategy parameters (ticks) including 1 Target, 2 Target, and 3 Target options.
